Catalog Number  Format  Concentration  1 mg/ml  Contents  1 mg/ml of  Specificity  This CY3 co  Tested Application  Fluorophores  Amax=554  Conjugation  Cy3  Application Notes  Please centused on the reagents u  Storage  At -20°C for from light.	Basic Information	
Format  Concentration  1 mg/ml  Contents  1 mg/ml of  Specificity  This CY3 co  Tested Application  IF, FCM  Fluorophores  Amax=554  Conjugation  Cy3  Application Notes  Please cenused on the reagents u  Storage  At -20°C fo from light.	gated Avidin	
Concentration  1 mg/ml  Contents  1 mg/ml of  Specificity  This CY3 co  Tested Application  IF, FCM  Fluorophores  Amax=554  Conjugation  Cy3  Application Notes  Please cenused on the reagents u  Storage  At -20°C fo from light.		
Contents  1 mg/ml of Specificity  This CY3 co Tested Application  IF, FCM  Fluorophores  Conjugation  Cy3  Application Notes  Please cenused on the reagents u  Storage  At -20°C fo from light.	ed, Liquid	
Specificity This CY3 co Tested Application IF, FCM Fluorophores Conjugation Cy3 Application Notes Please centused on the reagents u Storage At -20°C for from light.		
Tested Application IF, FCM  Fluorophores Amax=554  Conjugation Cy3  Application Notes Please centused on the reagents u  Storage At -20°C for from light.	CY3 conjugated Avidin; 0.01M PBS, 5 mg/ml BSA, 50% glycerol.	
Fluorophores  Conjugation  Cy3  Application Notes  Please centured on the reagents u  Storage  At -20°C for from light.	onjugated antibody is specific for Avidin.	
Conjugation Cy3  Application Notes Please centured on the reagents u  Storage At -20°C for from light.		
Application Notes  Please centused on the reagents u  Storage  At -20°C for from light.	nm; Emax=568nm	
used on the reagents u  Storage At -20°C fo from light.		
from light.	trifuge before use diluted by neutral PBS or TBS. The diluted solution should be e same day. Any unused solution should be disposed of. And Biotin related sed in combination.	
	r one year from date of receipt. Avoid repeated freezing and thawing. Protected	
Concentration 1:200—800 Optimal wo	orking dilutions must be determined by end users.
