| Basic Information | |
|--------------------|--|
| Product Name | Anti-Flag Tag Antibody (Clone#1E6) |
| Source | Mouse |
| Clonality | Monoclonal |
| Isotype | IgG2b |
| Species Reactivity | All species |
| Tested Application | Dot blot, ELISA, WB |
| Contents | 500ug/ml antibody with PBS ,0.02% NaN3 , 1mg BSA and 50% glycerol. |
| Immunogen | This antibody is produced by immunizing animals with a synthetic Flag tag (DYKDDDDK) peptide corresponding to KLH. |
| Concentration | 0.5mg/ml |
| Observed MW | 45 kDa |
| Dilution Ratios | Western blot (WB):1:500-5000 |

Storage

12 months from date of receipt, -20°C as supplied. 6 months 2 to 8°C after reconstitution. Avoid repeated freezing and thawing.

Background Information

FLAG-Tag, or FLAG octapeptide, or FLAG epitope, is a polypeptide protein tag that can be added to a protein using recombinant DNA technology, having the sequence motif DYKDDDDK. It represents an early example of a nanotechnology device, in that it can be attached to a protein like a molecular handle, then used to manipulate the protein, and subsequently detached. It has been used for studying proteins in living cells and for protein purification by affinity chromatography.

Anti-Flag Monoclonal Antibody

Western blot analysis of different concentration of Anti-Flag Tag(1E6) Monoclonal Antibody (M30971)

Blocking: Incubate the membrane with 5% Non-Fat Milk, PBS, 4 \perp overnight

Antibody Incubation: Diluted antibody in 5% Non-Fat Milk, TBS, 0.1% Tween-20, RT, 30mins
