Basic Inform	ideion	
Product Name	Anti-MPO Antibody	
Gene Name	MPO	
Source	Rabbit	
Clonality	Polyclonal	
Isotype	IgG	
Species Reactivity	human, mouse, rat	
Tested Application	WB, IHC, IF, FCM	
Contents	500 ug/ml antibody with PBS, 0.02% NaN3, 1 mg/ml BSA and 50% glycerol.	
Immunogen	A synthetic peptide corresponding to a sequence at the C-terminus of human MPO, different from the related mouse and rat sequences by one amino acid.	
Concentration	500 ug/ml	
Purification	Immunogen affinity purified.	
Observed MW	60-65 kDa,80-90 kDa	
Dilution Ratios		1:500-2000 1:50-400 1:50-400 1:50-200 e buffer,pH6.0,or PH8.0 EDTA repair liquid for 20 paraffin sections.) Optimal working dilutions must be

Storage

12 months from date of receipt, -20°C as supplied.

Background Information

Myeloperoxidase(MPO) is a mammalian phagocyte hemoprotein though to primarily mediate host defense reactions. It is abundantly expressed in neutrophils and secreted during their activation. Myeloperoxidase is part of the host defense system of human polymorphonuclear leukocytes, responsible for microbicidal activity against a wide range of organisms. It is located in the nucleus as well as in the cytoplasm. Intranuclear MPO may help to protect DNA against damage resulting from oxygen radicals produced during myeloid cell maturation and function.

Anti-MPO Antibody被引用在25文献中。

Selected Validation Data

Western blot analysis of anti-MPO antibody (BA0544). The sample well of each lane was loaded with 30 ug of sample under reducing conditions. Lane 1: human HL-60 whole cell lysates, Lane 2: rat thymus tissue lysates, Lane 3: mouse spleen tissue lysates, Lane 4: mouse thymus tissue lysates. After electrophoresis, proteins were transferred to a membrane. Then the membrane was incubated with rabbit anti-MPO antigen affinity purified polyclonal antibody (BA0544) and probed with a goat anti-rabbit lgG-HRP secondary antibody (Catalog # BA1054). The signal is developed using ECL Plus Western Blotting Substrate (Catalog # AR1197). A specific band was detected for MPO at approximately 60 kDa. The expected band size for MPO is at 84 kDa.

IHC analysis of MPO using anti-MPO antibody (BA0544).MPO was detected in a paraffin-embedded section of human tonsil tissue. The tissue section was developed using HRP Conjugated Rabbit IgG Super Vision Assay Kit (Catalog # SV0002) with DAB (Catalog # AR1027) as the chromogen.

IF analysis of MPO using anti-MPO antibody (BA0544).MPO was detected in a paraffin-embedded section of human spleen tissue. DyLight®488 Conjugated Goat Anti-Rabbit IgG (Green) (Catalog # BA1127) was used as secondary antibody. The section was counterstained with DAPI (Catalog # AR1176) (Blue).

Flow Cytometry analysis of HL-60 cells using anti-MPO antibody (BA0544). Overlay histogram showing HL-60 cells stained with BA0544 (Blue line). To facilitate intracellular staining, cells were fixed with 4% paraformaldehyde and permeabilized with permeabilization buffer. The cells were blocked with 10% normal goat serum. And then incubated with rabbit anti-MPO Antibody (BA0544) at 1:100 dilution for 30 min at 20°C. DyLight®488 conjugated goat anti-rabbit IgG (BA1127) was used as secondary antibody at 1:100 dilution for 30 minutes at 20°C. Isotype control antibody (Green line) was rabbit IgG at 1:100 dilution used under the same conditions. Unlabelled sample without incubation with primary antibody and secondary antibody (Red line) was used as a blank control.
