Immunogen Avidin Host Rabbit Purity The antibody was purified from antisera by immunoaffinity chromatography. Format Concentrated, Liquid Concentration 1 mg/ml Contents 0.1 mg of HRP conjugated specific antibody; 0.01M PBS, 50% glycerol. Specificity This peroxidase conjugate(HRP) conjugated antibody is specific for Avidin. Tested Application WB, ELISA Conjugation Peroxidase Application Notes Diluted by neutral PBS or TBS. Use of sodium azide as a preservative will substantial inhibit the enzyme activity of horseradish peroxidase. Storage At -20°C for one year from date of receipt. Avoid repeated freezing and thawing. Suggested Working Western Blotting: 1:200-400 (DAB detection) ELISA: 1:10000-100000 (TMB detection)	Basic Information	
Immunogen Avidin Host Rabbit Purity The antibody was purified from antisera by immunoaffinity chromatography. Format Concentrated, Liquid Concentration 1 mg/ml Contents 0.1 mg of HRP conjugated specific antibody; 0.01M PBS, 50% glycerol. Specificity This peroxidase conjugate(HRP) conjugated antibody is specific for Avidin. Tested Application WB, ELISA Conjugation Peroxidase Application Notes Diluted by neutral PBS or TBS. Use of sodium azide as a preservative will substantial inhibit the enzyme activity of horseradish peroxidase. Storage At -20°C for one year from date of receipt. Avoid repeated freezing and thawing. Suggested Working Western Blotting: 1:200-400 (DAB detection) Concentration Western Blotting: 1:2000-4000 (Enhanced chemiluminescent detection) ELISA: 1:10000-100000 (TMB detection)	Product Name	HRP Conjugated Rabbit Anti-Avidin
Immunogen Avidin Host Rabbit Purity The antibody was purified from antisera by immunoaffinity chromatography. Format Concentrated, Liquid Concentration 1 mg/ml Contents 0.1 mg of HRP conjugated specific antibody; 0.01M PBS, 50% glycerol. Specificity This peroxidase conjugate(HRP) conjugated antibody is specific for Avidin. Tested Application WB, ELISA Conjugation Peroxidase Application Notes Diluted by neutral PBS or TBS. Use of sodium azide as a preservative will substantial inhibit the enzyme activity of horseradish peroxidase. Storage At -20°C for one year from date of receipt. Avoid repeated freezing and thawing. Suggested Working Western Blotting: 1:200-400 (DAB detection) Concentration Western Blotting: 1:2000-4000 (Enhanced chemiluminescent detection) ELISA: 1:10000-100000 (TMB detection)	Catalog Number	BA1082
Purity The antibody was purified from antisera by immunoaffinity chromatography. Format Concentrated, Liquid Concentration 1 mg/ml Contents 0.1 mg of HRP conjugated specific antibody; 0.01M PBS, 50% glycerol. Specificity This peroxidase conjugate(HRP) conjugated antibody is specific for Avidin. Tested Application WB, ELISA Conjugation Peroxidase Application Notes Diluted by neutral PBS or TBS. Use of sodium azide as a preservative will substantial inhibit the enzyme activity of horseradish peroxidase. Storage At -20°C for one year from date of receipt. Avoid repeated freezing and thawing. Suggested Working Western Blotting: 1:200-400 (DAB detection) Concentration Western Blotting: 1:2000-4000 (Enhanced chemiluminescent detection) ELISA: 1:10000-100000 (TMB detection)	Isotype	IgG
Purity The antibody was purified from antisera by immunoaffinity chromatography. Format Concentrated, Liquid Concentration 1 mg/ml Contents 0.1 mg of HRP conjugated specific antibody; 0.01M PBS, 50% glycerol. Specificity This peroxidase conjugate(HRP) conjugated antibody is specific for Avidin. Tested Application WB, ELISA Conjugation Peroxidase Application Notes Diluted by neutral PBS or TBS. Use of sodium azide as a preservative will substantial inhibit the enzyme activity of horseradish peroxidase. Storage At -20°C for one year from date of receipt. Avoid repeated freezing and thawing. Suggested Working Concentration Western Blotting: 1:200-400 (DAB detection) ELISA: 1:10000-100000 (TMB detection)	Immunogen	Avidin
Concentration 1 mg/ml Contents 0.1 mg of HRP conjugated specific antibody; 0.01M PBS, 50% glycerol. Specificity This peroxidase conjugate(HRP) conjugated antibody is specific for Avidin. Tested Application WB, ELISA Conjugation Peroxidase Application Notes Diluted by neutral PBS or TBS. Use of sodium azide as a preservative will substantial inhibit the enzyme activity of horseradish peroxidase. Storage At -20°C for one year from date of receipt. Avoid repeated freezing and thawing. Suggested Working Concentration Western Blotting: 1:200-400 (DAB detection) Concentration Western Blotting: 1:2000-4000 (Enhanced chemiluminescent detection) ELISA: 1:10000-100000 (TMB detection)	Host	Rabbit
Concentration 1 mg/ml Contents 0.1 mg of HRP conjugated specific antibody; 0.01M PBS, 50% glycerol. Specificity This peroxidase conjugate(HRP) conjugated antibody is specific for Avidin. Tested Application WB, ELISA Conjugation Peroxidase Application Notes Diluted by neutral PBS or TBS. Use of sodium azide as a preservative will substantial inhibit the enzyme activity of horseradish peroxidase. Storage At -20°C for one year from date of receipt. Avoid repeated freezing and thawing. Suggested Working Concentration Western Blotting: 1:200-400 (DAB detection) Western Blotting: 1:2000-4000 (Enhanced chemiluminescent detection) ELISA: 1:10000-100000 (TMB detection)	Purity	The antibody was purified from antisera by immunoaffinity chromatography.
Contents 0.1 mg of HRP conjugated specific antibody; 0.01M PBS, 50% glycerol. Specificity This peroxidase conjugate(HRP) conjugated antibody is specific for Avidin. WB, ELISA Conjugation Peroxidase Application Notes Diluted by neutral PBS or TBS. Use of sodium azide as a preservative will substantial inhibit the enzyme activity of horseradish peroxidase. Storage At -20°C for one year from date of receipt. Avoid repeated freezing and thawing. Suggested Working Concentration Western Blotting: 1:2000-4000 (Enhanced chemiluminescent detection) ELISA: 1:10000-100000 (TMB detection)	Format	Concentrated, Liquid
Specificity This peroxidase conjugate(HRP) conjugated antibody is specific for Avidin. Tested Application WB, ELISA Conjugation Peroxidase Diluted by neutral PBS or TBS. Use of sodium azide as a preservative will substantial inhibit the enzyme activity of horseradish peroxidase. Storage At -20°C for one year from date of receipt. Avoid repeated freezing and thawing. Suggested Working Concentration Western Blotting: 1:200-400 (DAB detection) Western Blotting: 1:2000-4000 (Enhanced chemiluminescent detection) ELISA: 1:10000-100000 (TMB detection)	Concentration	1 mg/ml
Tested Application Peroxidase Application Notes Diluted by neutral PBS or TBS. Use of sodium azide as a preservative will substantial inhibit the enzyme activity of horseradish peroxidase. Storage At -20°C for one year from date of receipt. Avoid repeated freezing and thawing. Suggested Working Concentration Western Blotting: 1:200-400 (DAB detection) Western Blotting: 1:2000-4000 (Enhanced chemiluminescent detection) ELISA: 1:10000-100000 (TMB detection)	Contents	0.1 mg of HRP conjugated specific antibody; 0.01M PBS, 50% glycerol.
Conjugation Peroxidase Diluted by neutral PBS or TBS. Use of sodium azide as a preservative will substantial inhibit the enzyme activity of horseradish peroxidase. Storage At -20°C for one year from date of receipt. Avoid repeated freezing and thawing. Suggested Working Concentration Western Blotting: 1:200-400 (DAB detection) Western Blotting: 1:2000-4000 (Enhanced chemiluminescent detection) ELISA: 1:10000-100000 (TMB detection)	Specificity	This peroxidase conjugate(HRP) conjugated antibody is specific for Avidin.
Application Notes Diluted by neutral PBS or TBS. Use of sodium azide as a preservative will substantial inhibit the enzyme activity of horseradish peroxidase. Storage At -20°C for one year from date of receipt. Avoid repeated freezing and thawing. Suggested Working Concentration Western Blotting: 1:200-400 (DAB detection) Western Blotting: 1:2000-4000 (Enhanced chemiluminescent detection) ELISA: 1:10000-100000 (TMB detection)	Tested Application	WB, ELISA
inhibit the enzyme activity of horseradish peroxidase. Storage At -20°C for one year from date of receipt. Avoid repeated freezing and thawing. Suggested Working Western Blotting: 1:200-400 (DAB detection) Concentration Western Blotting: 1:2000-4000 (Enhanced chemiluminescent detection) ELISA: 1:10000-100000 (TMB detection)	Conjugation	Peroxidase
Suggested Working Concentration Western Blotting: 1:200-400 (DAB detection) Western Blotting: 1:2000-4000 (Enhanced chemiluminescent detection) ELISA: 1:10000-100000 (TMB detection)	Application Notes	Diluted by neutral PBS or TBS. Use of sodium azide as a preservative will substantially inhibit the enzyme activity of horseradish peroxidase.
Concentration Western Blotting: 1:2000-4000 (Enhanced chemiluminescent detection) ELISA: 1:10000-100000 (TMB detection)	Storage	At -20°C for one year from date of receipt. Avoid repeated freezing and thawing.
·		
3		ELISA: 1:10000-100000 (TMB detection) Optimal working dilutions must be determined by end users.
